

# Ideation Phase

## Brainstorming

Date	9 Feb 2026
Team ID	LTVIP2026TMIDS62719
Project Name	Translingua: ai-powered multi-language translator
Maximum Marks	4 Marks

### Brainstorm & Idea Prioritization Template:

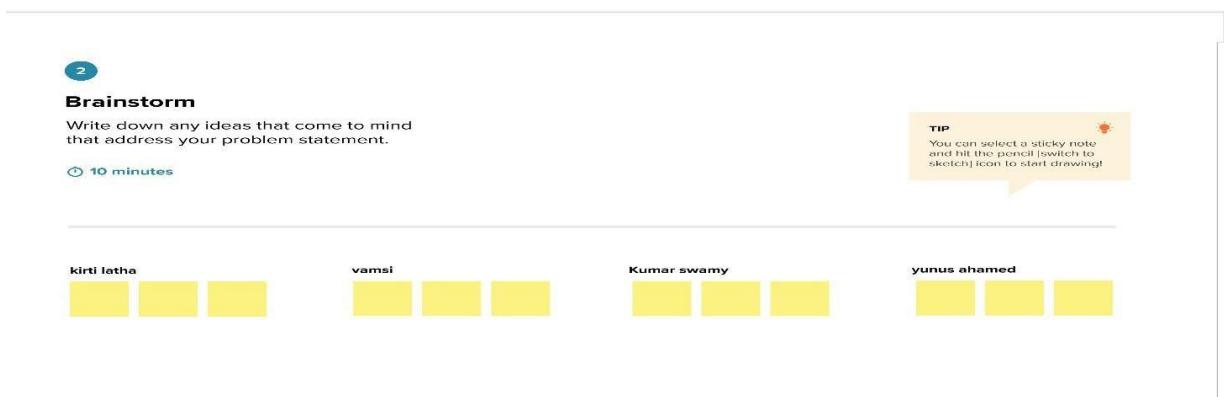

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions. Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

#### Step-1: Team Gathering, Collaboration and Select the Problem Statement

A vertical card for the 'Smart Sorting' project. At the top left is a lightbulb icon with wavy lines. To its right is a yellow sticky note icon. The title 'Smart Sorting' is at the top. Below it is a brief description: 'Smart Sorting is an innovative project focused on enhancing the precision and efficiency of detecting rotten fruits and vegetables.' A horizontal line follows. On the right side, there's a numbered callout '1' with a blue dot above it. Below it is a detailed description: 'Post-harvest losses due to spoiled produce affect both retailers and consumers. Traditional visual sorting techniques fail to keep up with high volumes and often miss early signs of rot. This project uses transfer learning to create a real-time, in-batch sorting system that distinguishes fresh fruits and vegetables from rotten ones. This automation helps ensure food quality, reduce wastage, and boost consumer trust.'

#### Step-2: Brainstorm, Idea Listing and Grouping

A horizontal card for the 'Brainstorm' step. It features a numbered callout '2' at the top left. The title 'Brainstorm' is bolded. Below it is a tip: 'Write down any ideas that come to mind that address your problem statement.' A timer icon indicates '10 minutes'. To the right is a 'TIP' box: 'You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!' Below the main area are four names with corresponding yellow sticky notes: 'kirti lathe' (three notes), 'vamsi' (three notes), 'Kumar swamy' (three notes), and 'yunus ahamed' (three notes).

3

#### Group ideas

Idea is to build the application to detect whether the given input image of Fruits & Vegetables are healthy or notce using some software's and webpage.

### Step-3: Idea Prioritization

4

#### Prioritize

The building of project is completely based on the priorities of the application needed at most, for our project the first priority is to download dataset and train a model for the downloaded dataset.
